

## **Fight against terrorism and threats**

**In the name of Allah**

**Excellency president, members of parliaments and distinguished guests,**

First of all I would like to say hello on behalf of the Afghan parliament. Then, as a member of Afghan parliament as a country which is a great victim of terrorism and threats; would like to emphasize on this fact, that terrorism is a dangerous disease, which doesn't know any border and doesn't have any limitation in human society. So fight against terrorism is a joint worldwide and international solidarity attempting of us.

Terrorism is a danger, which faces the entire human society with threat. Terrorism can face every country in every time with threat and it makes victim the human society without paying attention to its religious , ethnic, linguistic, political system, manner, and it's geographical location. Victims of terrorism are not only related to one or two specific countries or to one religion and specific ideology, ethnic or nation, but it makes victim different countries, nations and ethnics. Although terrorists are from different countries, with different languages, identities and ethnics, but they do similar actions. The terrorists during their activities and operations from America to Africa and Asia have one common

tactic and similar strategy. This strategy is made from threat, violence and killing of humans. Muslims are the first and great victims of those terrorists who did all the heinous operation from the address of faith and religion. Muslims of Afghanistan, Pakistan, Iraq and Syria are from among those Muslims who always are victims of terrorism and they are killing and burning in firing and bomb blasting of terrorisms. In these countries, the victims of terrorists and their tragedy actions, shows that terrorists are vicious, cruel, hypocrite, and liar group that kill Muslims.

**Dear parliamentarians and distinguished guests!**

It is clear for all that fight against terrorism would finish successfully, while the entire states and countries of the world take part in fighting against them. There is one point that I would like to emphasize on it: those countries which want to fight against terrorism should not finish this battle in its military point, because we cannot get victory only by fight against terrorism, we must eradicate this disease via its social, economical, political, cultural, religious and ideological ways.

Terrorism has relation with poverty, injustice, ignorance, asphyxia, autarchy and proscriptions from society and civil rights. Terrorism is growing-up from lack of freedom, democracy, and social injustice, lack of political and economical development.

The International society has to recognize roots of the terrorism via its joint, wide, and bilateral attempts. The world society by having a joint view of understanding from the terrorists, should fight

against it and find the ways for modifying and eradication of their roots.

If the countries and the states think that by none participating in joint fight against terrorism, they could remain safe and will not be faced with terror danger and threat, this could be a great and irrecoverable mistake of them.

So terrorism is a worldwide danger, which threatens all the countries, not only one. In order to rescue from this danger, we must not be apathetic, instead we should fight together against this disease. We all must fight against terrorism with all our ability which we have in our hand and with our military, social, economical, political, and cultural power.

Thank you very much for your keen attention
