## **DRAFT RESOLUTION**

### **The Need to Equip Passenger Aircraft with Additional Technical Means for Monitoring Conditions on Board in Real Time**

**Principal Sponsor: Mr. Nikolay Kovalev (Russian Federation)**

1. Bearing in mind the growing terrorist threat in the OSCE region,
2. Reaffirming its commitment to making every effort to help ensure security in the OSCE region and to conduct a systematic and unrelenting fight against all manifestations of international terrorism,
3. Noting that large passenger aircraft continue to be priority targets of terrorist attacks,
4. Noting that the lack of the necessary technical means on passenger aircraft makes it impossible for ground personnel to conduct video monitoring of conditions on board in real time, thus significantly reducing the ability to protect airliners from terrorist and other threats to the security of passengers and resulting in large numbers of human victims,

The OSCE Parliamentary Assembly:

5. Calls on the participating States and manufacturers to give close attention to the problem of the vulnerability of passenger aircraft to terrorist attack and to contribute actively, within their powers and competence, to equipping existing and planned passenger aircraft with photographic and audio-visual monitoring equipment on board as soon as possible so that data can be collected, saved and sent to ground personnel in real time;
6. Urgently appeals to the parliaments of the participating States to begin elaborating, without delay, the legal basis for the practical implementation of this initiative.
