## Parliamentary Training Project in Albania

On 20 December 2001, two members of the OSCE Presence in Albania visited the International Secretariat to discuss OSCE PA participation in a long-term assistance project entitled: "Modernizing the Capacity of the Assembly of the Republic of Albania". The project, which has been approved by the Albanian Parliament and will be financed by the Dutch Government, aims to enhance the capacity of deputies and parliamentary staff to carry out their roles and responsibilities as the representational body for Albanian citizens. This role has hitherto been limited by the concentration of the legal and technical expertise in the Government, leaving MPs without the necessary resources to contend with increasingly complex legislation or to oversee the Governments activities.

The project will be focused on three main areas: 1) A long-term training programme for MPs and their staff, including the creation of a permanent training capacity within Parliament. 2) The creation of a research and advisory unit to support the work of MPs and the parliamentary commissions. 3) Support for outreach activities to promote greater awareness amongst the public of the role of parliamentarians and greater responsibility to the electorate on the part of MPs. To achieve this the project foresees utilizing the expertise of the OSCE Parliamentary Assembly, the Parliamentary Assembly of the Council of Europe, the European Parliament, the NATO Parliamentary Assembly, the World Bank Institute, as well as national parliaments.
